

Setting Up to Print From a Chromebook While Logged in as a Mill Falls Student

Purpose: These instructions are for families who have a Chromebook with a printer set up, but are having difficulty printing when logged in as a Mill Falls Student.

When logged in as the MFCS Student:

- 1: Open new Chrome browser window
- 2: Go to: <chrome://os-settings/printing>

Important Notes:

- That link will **only** work on a Chromebook.
- It bypasses the normal settings a user would usually go to either through the gear icon on the bottom of the screen, or going to Settings on a browser window.

- 3: From here the user will see any printers attached to the Chromebook
- 4: Select the desired printer and add it as an option for printing.

Important Note:

- It is possible that not all printers work with Chromebooks.
